

Test Case

Summary: Check removing of a record from the database

Preconditions:

Go to a web application, open account settings.

Set up the 'Oracle SQL Developer'

Test Steps:

1. Press the 'Delete account' button in "Delete your account?" pop up window.
2. Open 'Oracle SQL Developer'.
3. Check database content using SQL query.

SQL query:

```
SELECT account_id FROM Accounts WHERE account_id = 1112754
```

Expected Results:

1. The account is removed from Database.
2. The 'Oracle SQL Developer' is ready to write a SQL query.
3. There are no rows in the results of the 'Oracle SQL Developer' application.
